

Laxtracide CAPB

TECHNICAL INFORMATION

Description

It is a highly effective amphoteric surfactant and is stable even in strong electrolytic medium. It is used as a conditioner, antistatic agent and foam stabilizer, in household and industrial detergents and toiletries.

Composition

Cocoamidopropyl Betaine

CAS No:

Functional Properties

Anti-static agent
Cleaning compound
Conditioner
Dispersant
Emulsifier-amphoteric
Foam booster
Shampoo base

Target Industries

Toiletries
Soaps & Detergents
Textile
Cosmetics
Construction

Typical Properties

Colour & Appearance	Pale yellow clear liquid
Nature	Amphoteric
5% pH (in distilled water)	5.0-7.0
Solubility in water	Soluble
Sodium chloride % (max)	6.0
Solids %	33.0 ± 1

Dosage

The dosage of Laxtracide CAPB is recommended @ 0.1 to 0.5 % of the final product depending on the type and susceptibility of the finished product and the raw material used.

The **Sonachi** Microbiological Laboratory will be ready to assist in the optimization of the dosages required for the products. This facility is most useful where formulation has greater microbiological susceptibility.

Method of Use

Laxtracide CAPB can be added either manually or by automatic metering device, at any stage of the production process.

Compatibility

Laxtracide CAPB is compatible with most of the raw materials used in the microbiological susceptible products. It causes no discoloration and may be used in formaldehyde sensitive systems.

Availability

Laxtracide CAPB is readily available ex-stock at all time in 50/200 kgs HDPE carboys.

Storage

It is also recommended that product should be stored in original Sonachi sealed containers at ambient temperature and protect from direct exposure of sunlight. It is also recommended that the product should be used within 6 months of delivery.
